VOLVO Data/MEXPACK software meeting 88-08-17.

 COMPLETED/CLOSED ITEMS.

DTF install.
 ESE install.
 PL/I library.
 N/W authorisation exit.
 QMF printing.
 Generation of second IMS system.
 IMS PUT upgrade.
 USS table update.
 FILEMON automatic monitoring request.
 Network authorisation exit for VTAM.

 EXISTING ITEMS.

 MD-Plot.

Not used at DC&K at present, will close this one and discuss usage with Bosse Dalhen when needed.

 IKT00405I msg with TSO/VTAM.

Only for 31796/32796 terminals. Screen erasure msg repeated. Waiting for resolution from IBM. Circumvention is to repeat "enter" a few times. WAITING FOR IBM.

 NETVIEW PTF's.

Issuer: 2510 GUNNEL ISAKSSON TEL 667162 031-667162

Subject: MEX möte 08-17 88-08-25

IPL volume shipped for ACF2 R5 will contain many NETVIEW fixes. Also see below.

Next MEXPACK.....ACF2 R5, NETVIEW and MVS/SP V2.2.

It was agreed that DC6K will convert to use UADS, as specified by VD, as a temporary measure (about 6 months) to remain compatible with other VCN ACF2 nodes. It is expected that a full implementation of ACF2 Info Storage DB will occur during 1Q89.

The conversion to UADS will be done before ACF2 R5 is installed. Plan UADS conversion V35, plan ACF2 R5 in V37, V38 or V39 subject to plans for DC6K 3081 swap of processor. Will review the situation after the UADS conversion.

When ACF2 R5 is installed, about 6 months of MEXPACK software maintenance will also be delivered, including all the known fixes for NETVIEW.

The ACF2 R5 install will also include defining MSM as a MUSASS, changing from NOSAF to SAF and using CLIST FUID for registration.

MEXPACK(V2.2) now scheduled for V43.

FILEMON.

FILEMON+ACF2 security. VD to assist install at DC6K in V35.

VD Naming Standards and Exceptions for MEXPACK.

99% complete.

OSNS.

Next release on its way. DC6K will need to relink ODEX for XA version. VD have no time at present, will provide in September.

DELTA IMS Product.

Would like next release with dynamic logon, i.e. no IMS terminal gen, as soon as possible. Product available at VD but no time available for testing the product, in particular with non-3270 type terminals. DC6K are willing to test the product. Hans M to contact Tony G to arrange.

VD modifications in MEXPACK.

Issuer: 2510 GUNNEL ISAKSSON TEL 667162 031-667162

Subject: MEX möte 08-17 88-08-25

DCBK would like a list of all usermods in each MEXPACK release. Also any messages that these changes/additions might issue.
SMP installed user mods are documented on the IPL volume in a text member.

DCBK would like documentation on any operating system or program product modification or addition that is different from vendor supplied documentation.
VD are reviewing the situation on this one.

IMS procedures containing non-P6 names.

DCBK have provided a list of errors found in VD provided procedures.

VD agreed to correct before next MEXPACK shipment.
Some changes have been made in the IMS environment.

Issuer: 2510 GUNNEL ISAKSSON TEL 667162 031-667162

Subject: MEX möte 08-17 88-08-25

SMP/E at DCöK.

Implications of SMP/E at DCöK.

- Small amount extra of DASD.
- Extra licence for SMP/E.
- VD would ship extra just the target zones. About 20 cyl.
- Planning for the IPL volume to be on an E-box should be expected in 4Q88.

Another option is to always ship a full IPL volume instead of SMP/E. Needs further discussion.

Source for VD precompiler.

DCöK need a copy of the source. To be discussed in another forum.

Source for JCLSPLIT.

DCöK need a copy of the source to assemble and use a copy. To be discussed in another forum.

Activities for automated operations.

VD recommend we contact John-Erik Hörnfeldt(2160) or Ingegert Jansson(2120).

Issuer: 2510 GUNNEL ISAKSSON TEL 667162 031-667162

Subject: MEX möte 08-17 88-08-25

NEW ITEMS.
-----ACF2 ITEMS.

For general information, the following tasks connected with ACF2 are in progress.

The list will be reviewed with ACF2 R5 install.

- Define DCCK administration rules for ..OP ..TE ..DL.
- Investigate use of JOBCOPY for production logons.
- Control of non-DCCK users with high authority.
- Investigate logon suspensions and reporting.
- Investigate use of scope lists.
- PANVALET system administrator needs to be controlled without supplying a password.
- Protection of APF programs in LINKLST.
- Test of DBS/SAF circumvention.
- ACF2 R4 to R5 planning.
- ACF2 and VCN job submission. NJE password encryption.
- ACF2 inclusion in MEXPACK.
- Protection for space-mngt programs in MAINT-miljö.
- Add ACF2 security to DTF product.
- Protection for ZZ system. ACF2 and physical.
- DCCK usage rules for privileged users.
- Investigate ACF2 implications for using the "Session management exit".

Nästa Möte.

Nästa möte onsdagen den 14 September kl 13.00 på DCCK.

VOLVO Data/MEXPACK software meeting 88-05-30.

EXISTING ITEMS.

MD-Plot.

Not used at DC6K at present, will close this one and discuss usage with Bosse Dalhen when needed.

IKT004051 msg with TSO/VTAM.

Only for 3179G/3279G terminals. Screen erasure msg repeated. Waiting for resolution from IBM. Circumvention is to repeat "enter" a few times. WAITING FOR IBM.

DTF Install.

Installing at DC6K W822.

EGE Install.

DC6K would like the product installed ASAP without the DB2 connection. To be installed on the DC6K IPL volume.

NETVIEW PTF's.

Situation with product fixes is still unstable. No change.

Issuer: 2510 GUNNEL ISAKSSON TEL 667162 031-667162

Subject: MEX möte 05-30

88-06-06

Will need new MEXPACK to install as many co-req and pre-reqs have been generated in NETVIEW, VTAM, etc.

Next MEXPACK.....ACF2 R5, NETVIEW and MVS/SP V2.2.

ACF2 R5.....no change. The IMS PUT upgrade will include ACF2 R5 modules, they should be able to co-exist with R4 modules.

NETVIEW.....no change.

MVS/SP V2.2 implementation.....to be discussed at the next meeting. PUT for IMS being supplied is a definite pre-req. New version of SDSF and VD IDCAMS are normal upgrades.

FILEMON.

Automatic monitoring of queues in FILEMON.
VD recommend using NETVIEW but are unwilling to implement the facility.

FILEMON+ACF2 security is outstanding.

PL/I Library.

Complete.

VD Naming Standards and Exceptions for MEXPACK.

Full list is outstanding to VD. Mats V agreed to complete by the end of June.

Network authorisation exit for VTAM.

Johan to contact Bosse Nilsson to get a fresh copy; maybe ours is not current.

OBNS.

Next release on its way. DCCK will need to relink ODEX for XA version. VD have no time at present, will provide in September.

DELTA IMS Product.

Would like next release with dynamic logon, i.e. no IMS terminal gen, as soon as possible. Product available at VD but no time available for testing the product, in particular with non-3270 type terminals. DCCK are willing

to test the product. Hans M to contact Tony G to arrange.

VD modifications in MEXPACK.

DCBK would like a list of all usermods in each MEXPACK release. Also any messages that these changes/additions might issue. SMP installed user mods are documented on the IPL volume in a text member.

DCBK would like documentation on any operating system or program product modification or addition that is different from vendor supplied documentation. VD say: "something on its way".

IMS procedures containing non-P6 names.

DCBK have provided a list of errors found in VD provided procedures.

VD agreed to correct before next MEXPACK shipment.

Issuer: 2510 GUNNEL ISAKSSON TEL 667162 031-667162
Subject: MEX möte 03-30 88-06-06

NEW ITEMS.

Setup for QMF printing.

A STC has been started.

Generation of a second IMS system for DC6K.

VD work completed.

IMS PUT upgrade.

In progress W823.

SMP/E at DC6K.

Implications of SMP/E at DC6K.

- Small amount extra of DASD.
- Extra licence for SMP/E.
- VD would ship extra just the target zones. About 20 cyl.
- Planning for the IPL volume to be on an E-box should be expected in 4Q88.

USS table updates.

Need new ones for IMS production and MEMO.

Source for VD precompiler.

DC6K need a copy of the source. Kjell to advise Stephen.

Source for JCLSPLIT.

DC6K need a copy of the source to assemble and use a copy.
Please supply to Johan.

Activities for automated operations.

VD recommend we contact John-Erik Hörnfeldt(2160) or
Ingegerit Jansson(2120).

Issuer: 2510 GUNNEL ISAKSSON TEL 667162 031-667162

VOLVO Data/MEXPACK software meeting 88-05-02.

For the future, there will be three sections, existing,
 new, and ACF2 items.

Original 13 Outstanding items.

1. COMPLETED.
2. COMPLETED.
3. OPX.
OK. COMPLETED.
4. MD-Plot.
Not used at DCöK at present; will close this one and
 discuss usage with Bosse Dalhen when needed.
5. IMS panels in TSO.
Considered to be a COMPLETED task.
6. COMPLETED.
7. "old" COBOL.
COMPLETED.
8. V+.
COMPLETED.
9. PANVALET.
DCöK now has new version that has been tested at VD.

Issuer: 2510 GUNNEL ISAKSSON TEL 667162 031-667162

Subject: MEX möte 05-02 88-05-19

Consider COMPLETED.

10. IKFDD405I msg with TSO/VTAM.
Only for 31796/32796 terminals. Screen erasure msg repeated. Waiting for resolution from IBM. Circumvention is to repeat "enter" a few times. WAITING FOR IBM.
11. ACF2 problem and browse.
Moved to ACF2 section. Closed here, see below.
12. COMPLETED.
13. DSS and ACF2/SAF Problem.
Moved to ACF2 section. Closed here, see below.

Issuer: 2510 GUNNEL ISAKSSON TEL 667162 031-667162

Subject: MEX möte 05-02 88-05-19

EXISTING ITEMS.
-----DTF Install.

Schedule install to start W819. Johan.

ESE Install.

To be installed with SMP but needs PASCAL library. Waiting for PASCAL library shipment from IBM. Jan-Peter Hendrich at VD is working with ESE. VD to inform us by ESE+PASCAL-lib is ready for DC6K. Kjell to arrange a licence for the PASCAL library. No installation date available at present; DC6K would now like to use this product.

NETVIEW PTF's.

Will need new MEXPACK to install as many co-req and pre-reqs have been generated in NETVIEW, VTAM, etc.

Next MEXPACK.....ACF2 R5 and NETVIEW.

Stephen, Lars and Johan saw Bengt R on ACF2 issues on 14th April. Minutes of the meeting published.

At present there is no urgency to move to ACF2 R5 or take a MEXPACK because of NETVIEW.

Prefered course of action is to wait for the next MEXPACK release with ACF2 R5 and NETVIEW fixed.

FILNON.

Stephen requested a facility to automatically monitor transmission queue and issue a SEND to the network operator if intervention is required. Kjell agreed to find out if VD could do this.

ACF2 and inheritance.

Transferred to ACF2 section. Closed here; see below.

INFO/MAN.

Catarina Gani will investigate for DC6K.

PL/I Library.

Issuer: 2510 GUNNEL ISAKSSON TEL 667162 031-667162

Subject: MEX möte 05-02 88-05-19

Licence arranged. LOADLIB's need to be moved to IPL volume.
VD Naming Standards and Exceptions for MEXPACK.

Full list is outstanding to VD.
Network authorisation exit for VTAM.

Johan to contact Bosse Nilsson to get a fresh copy,
maybe ours is not current.

VTAMLST changes for STATMON.

CLOSED.

OSNS.

Next release on its way. DCBK will need to relink ODEX
for XA version. Waiting for VD.

DELTA IMS Product.

Would like next release with dynamic logon, i.e. no IMS
terminal gen, as soon as possible. Has been ordered
for testing, to be evaluated. Would like an availability
date please.

VD modifications in MEXPACK.

DCBK would like a list of all usermods in each MEXPACK
release. Also any messages that these changes/additions
might issue.
SMP installed user mods are documented on the IPL volume in
a text member.

DCBK would like documentation on any operating system or
program product modification or addition that is different
from vendor supplied documentation.

Network Startup Sequence.

VD 2110 requested change in N/W S/W start sequence. Any
risks? VD suggest we discuss with Håkan Robertson at VD.

ACF2 and VCN job submission.

Issuer: 2510 GUNNEL ISAKSSON TEL 667162 031-667162

Subject: MEX möte 05-02 88-05-19

Closed here, see below.

Latest MEXPACK Schedules.

Next scheduled MEXPACK will be at MVS/SP V2.2.1. Planned for September or October '88.

VD are installing V2.2.1 due to virtual storage constraints generated by the requirement for co-existence of RACF and ACF2.

Issuer: 2510 GUNNEL ISAKSSON TEL 667162 031-667162

Subject: MEX möte 05-02 88-05-19

NEW ITEMS.

IMS procedures containing non-P6 names.

DCöK provided a list of errors found in procedues. DCöK would like the originals changed at VD, P6 a fresh copy (contact is Tony or Håkan) before the next MEXPACK.

Generation of a second IMS system for DCöK.

DCöK would like Henrik Holst to complete this task by 29th May. Kjell to advise if this cannot be achieved.

BMP/E at DCöK.

After the meeting, VD says that this is a possibility. To be discussed.

ACF2 ITEMS.

- ACF2 and browse.
- DSS and ACF2/SAF.
- ACF2 and inheritance.
- ACF2 R5.
- ACF2 and VCN job submission.
- ACF2 inclusion in MEXPACK.

Nästa Möte.

Nästa möte Måndagen den 30 Maj kl 13.00 på DCöK.

VOLVO Data/MEXPACK software meeting 88-03-18.

Original 13 Outstanding items.

1. FILEMON Security.
DCöK will use version with no security until the ACF2 interface is implemented.
COMPLETED.
2. JCLSPLIT.
Outstanding.
3. OPX.
Available. DCöK to check.
4. MD-Plot.
Outstanding.
5. IMS panels in TSO.
The shipment of the SU environment has caused problems. Tony summarised the problem for Inge to address at VD. DCöK will fix what is here now.
6. COMPLETED.
7. "Old" COBOL.
In progress.
8. V+.
PTF's received from Pansophic and solved at VD. To be

Issuer: 2510 GUNNEL ISAKSSON TEL 667162 031-667162

Subject: mexcheck1803 88-03-21

shipped to DC&K.

9. PANVALET.
DC&K need version 12A PTF's when available.
10. IKTO0405I msg with TSO/VTAM.
Only for 3179G/3279G terminals. Screen erasure msg repeated. Waiting for resolution from IBM. Circumvention is to repeat "enter" a few times. WAITING FOR IBM.
11. ACF2 problem and browse.
Problem found to be connected to WTP ACF2 option.
Can be circumvented by not using WTP but this is not a solution as WTP will be needed.
DC&K would like to know if it is a) Known problem;
b) Fixed in ACF2 R5;
or c) Another circumvention is available.

VD to advise.
12. COMPLETED.
13. DSS and ACF2/SAF Problem.
The current circumvention to the DSS problem is to switch off the ACF2/SAF interface. ACF2 has a SAF exclusion list called SAFLIST for components to be excluded from ACF2/SAF; this has not been tested.
Bengt has supplied a list of 4 options for DC&K; one is a PTF which we would like. DC&K will decide next action.

New items.

IMS Shadow Application.

Shipped to DC&K. Waiting for DC&K to test.

USS/LOGMODE Tables.

VD to supply changes caused by MEMO split. COMPLETED.
Inge has discussed with N/W group DC&K question of providing source. This is acceptable if used for reference purposes only. A copy will be sent to DC&K as soon as possible and updates will be on request from DC&K. VD TO SUPPLY.

DTF Install.

On Johan's schedule.

ESE Install.

Issuer: 2510 GUNNEL ISAKSSON TEL 667162 031-667162

Subject: mexcheck1803 88-03-21

To be installed with BMP but needs PASCAL library. Waiting for PASCAL library shipment from IBM. Jean-Peter Fendrich at VD is working with ESE.

NETVIEW PTF's.

There are 48 PTF's for NETVIEW. DC&K would like to install as soon as possible(ASAP), VD to supply please.

ACF2 R5.

DC&K will consider this upgrade with the next MEXPACK. No plans at present.

FILEMON.

Stephen requested a facility to automatically monitor the transmission queue and issue a SEND to the network operator if intervention is required. Inge to advise. Ake Lindmark in VD 2230 is contact.

ACF2 and inheritance.

Lars described a problem of authorisation not being inherited for jobs submitted from procedure "J".

INFO/MAN.

Product being customised.

PL/I Library.

Johan reported that this is a requirement for VMF.

VD Naming Standards and Exceptions for MEXPACK.

Full list is outstanding. Gunnel to supply.

Nästa möte Måndagen den 11 April kl 13.00 på DC&K.

Progress on MEXPACK software outstanding items 88-03-04.

Outstanding items.

1. FILEMON.
 VD say all future FILEMON shipments will be ACF2/RACF compatible. A version of FILEMON without security has been shipped to DCBK. COMPLETED.
 JE to implement in a CLIST with a call to ACF2 as a short term solution.
2. JCLSPLIT.
 Expected to be completed in WB10.
3. OPX.
 Outstanding.
4. MD-Plot.
 Outstanding.
5. IMS panels in TSO.
 Outstanding.
6. IMF PTF missing.
 Outstanding.
7. "Old" COBOL.
 In progress.
8. V+.

Waiting on Pansophic PTF. VD to advise.

9. PANVALET.

In progress. VD to advise.

10. IKTO0405I msg with TSO/VTAM.

Only for 31796/32796 terminals. Screen erasure msg repeated. Waiting for resolution from IBM. Circumvention is to repeat "enter" a few times. WAITING FOR IBM.

11. ACF2 problem and browse.

Outstanding with Bengt Ryberg and DC&K. Needs further work. Lars handling at DC&K. VD plan production ACF2 operation by August 1988. Problem found to be connected to WTP ACF2 option. Problem can be circumvented by not using WTP but this is not the solution as WTP will be needed. Problem OUTSTANDING.

12. Cluster definition for VVDS incorrect.

COMPLETED.

13. DSS and ACF2/SAF Problem.

The current circumvention to the DSS problem is to switch off the ACF2/SAF interface. ACF2 has a SAF exclusion list called SAFLIST for components to be excluded from ACF2/SAF. DSS needs to be tested with SAFLIST. Lars to schedule.
IN PROGRESS.

IMS Shadow Application.

Inge to resolve.

RACF Ownership.

VD recommend switching off ownership flag if found.

USS/LOGMODE Tables.

VD to supply changes caused by MEMO split.

Inge to discuss with N/W group DC&K question of providing source.

DTF Install.

Gunnel and Johan to arrange.

ESE Install.

Inge to advise.

Protokoll of meeting 880226.

Relationship of DC&K and VD for MEXPACK software.

- Agenda -
1. How it works at other VD supplied sites.
 2. VD requirements.
 3. DC&K requirements.
 4. Points of contact.
 5. DC&K/VD relationship rules.
 6. Planned changes.
 7. Handling problems.

The objective of the meeting was to establish the 'ground rules' for MEXPACK software installed at DC&K.

1. How it works at other VD supplied sites.

Inge, Gunnel and Mats outlined the basic design and distribution concepts of MEXPACK. In particular:

- Four levels of HLQ:

1 User libraries.	first
2 DC&K libraries.	I
3 VD libraries.	V
4 Vendor shipped libraries.	last
- Levels 3 and 4 are VD responsibility and maintained using SMP.
- Most datasets in levels 3 and 4 are identified by a HLQ of F1*****. Some second level qualifications start F1*****. A list of exceptions is to be supplied by Gunnel. As a general rule, level 3 and 4 datasets must NOT be modified by DC&K.
- DC&K are responsible for level 2 and any recommendations to users for level 1.
- Most datasets shipped to DC&K will be on the IPL volume. The objective is to ship all datasets on this OSS volume copy.

Issuer: 2510 GUNNEL ISAKSSON TEL 667162 031-667162

Subject: prot2602mex 88-03-04

-
- Vendor (mainly IBM) distribution libraries are not shipped to DC&K.
 - EDTGEN's can be performed as required by DC&K. Documentation available as a step-by-step guide in a PDS.
 - MEXPACK product consists of MVS and network related software only. Products DB2 and IMS are not considered part of the MEXPACK. These products are shipped independently MEXPACK and identified by generic dataset HLQ.
 - Upgraded MEXPACK is implemented with an IPL of the new volume. Backout by IPL of the original.
 - SYS1.PARMLIB/PROCLIB will be shipped on the IPL volume. DC&K will update a copy on the CAT volume for production use.
 - The contents of JESPARMS is a DC&K responsibility. VD will inform DC&K about changes to parameters. The global NJE parameters are updated on a regular basis. Gunnel to include this in the list of exceptions.

2. VD requirements.

Recommended restricting access to F1*****. datasets to technical staff.

3. DC&K Requirements.

Particular requirements that have been identified by DC&K are as follows:

- Possible to contact VD staff out of hours.
- For urgent situations, i.e. where a change needs to be implemented the following day, a method of contacting VD staff.
- Have a method of updating LOGMODE/USS for VOLVO network.
- Have access to an environment with SMP for installing DC&K acquired software.
- A contact and follow-up procedure for problem determination of VD supplied software.

The above items were addressed during other discussions.

4. Points of contact.

Mats will be the main DC&K contact point in VD for MEXPACK software. Contact the person handling the software product if appropriate.

5. DC&K and VD relationship.

Volvo Data's objective is to ship repackaged software on a regular basis. The frequency will vary but currently three updates per year are estimated.

An update of system software twice a year was originally planned by DC&K.

Where DC&K need to install software using SMP, the work will be performed at VD as a combined activity. DTF will be installed at VD in this manner and the libraries copied to DC&K.

In general, DC&K will inform VD of future requirements

Issuer: 2510 GUNNEL ISAKSSON TEL 667162 031-667162

Subject: prot2602mex 88-03-04

for MEXPACK software.

Next regular meeting with VD is planned for the Spring where DC&K future requirements will be discussed. DC&K will informally discuss with VD experiences of the original installation.

6. Planned changes.

Discussion points were as follows.

- Network upgrade dates are planned in an 'A-plan' document.
- F1*****VTAMLST cannot be updated by DC&K. To be discussed with VD group 2210. Also LOGMODE entries.
- VD to inform DC&K of new or changed software functions or parameters, i.e. new parameter in JESPARM.
- IOCDS is DC&K responsibility. DC&K to supply VD with new or changed device addresses. DC&K update IOCDS and supply updates to VD.
- The situation regarding IO configuration when MVS V2.2 and DFP V2.3 is available from VD is not decided yet.

7. Handling Problems.

A priority system similar to IBM (1,2,3) operates internally at VD. Descriptions as follows.

- priority 1 - System down (processor or network) or unable to operate production system.
- priority 2 - Severe impact to one or more major components.
- priority 3 - Component operating in a degraded mode.

Most contact with VD is expected to be at priority 3 level. Out of hours, contact the Help Desk at VD for urgent problems.

The status of problems will be discussed at the regular meetings with VD.

Outstanding items from meeting 880229 on MEXPACK checkpoint.

Inge will produce the regular protocol. The following is a list of outstanding items from the MEXPACK install. Unless otherwise stated, all MEXPACK products have been installed and tested by VD.

1. FILEMON.

FILEMON with ACF2 is not available. A new version for RACF will be available in about 3 weeks. The situation of using FILEMON from DC6K to another VOLVO node with RACF was not clear. If DC6K use a version of FILEMON without security it may be the solution for a short period. VD to check and advise on options available to DC6K. Johan to handle at DC6K.

2. JCLSPLIT.

Installed but outstanding DC6K customisation. A panel also needs to be changed for ACF2 instead of RACF. VD estimate about 1 week. Stefan and Tony handling at DC6K.

3. OPX.

Installed at DC6K but not in correct libraries. Lars to handle at DC6K with Mats.

4. MD-Plot.

Outstanding.

5. IMS panels in TSO.

Used for assembling PSB's. Tony handling at DC6K.

6. IMF PTF missing.

Required to stop ABEND when stopping. Tony to handle at DC6K.

Issuer: 2510 GUNNEL ISAKSSON TEL 667162 031-667162

Subject: mexcheck2902 88-03-04

7. "Old" COBOL.
Resolution expected this week for DATA-OPT and DATA-MAN situation.
8. V+.
Waiting on Pansophic PTF. VD to advise.
9. PANVALET.
Waiting for PTF's. VD to advise.
10. IKTD0405I msg with TSO/VTAM.
Only for 3179G/3279G terminals. Screen erasure msg repeated. Waiting for resolution from IBM. Circumvention is to repeat "enter" a few times.
11. ACF2 problem and browse.
Outstanding with Bengt Ryberg and DCBK. Needs further work. Lars handling at DCBK. VD plan production ACF2 operation by August 1988. Problem found to be connected to WTP ACF2 option; can be resolved at DCBK.
12. Cluster definition for VVDS incorrect.
Identified after the meeting. Requires VD to delete.

Further work will be carried out in combination with DCBK and VD. IPL's on request. A backup of the IPL and CAT volumes will be taken each night.

At the time of the meeting the connection to VD was not operational. Line is TJD32. Suspect line or modem fault.
- 13.0 After the meeting DSS could not be used for backup.
A circumvention to the program check DC4 in DSS is to turn off SAF processing in ACF2. This has been done and the MEXPACK environment backups will be taken on 88-03-02.
