INFORMATIONEmergency power supply

Since W926 we have had Emergency power supplies installed at Volvo Data. The Emergency provides the whole DA- and DB-buildings and also the Computer Centre at PVSV with power.

The Emergency power supply is divided into two groups, each group consisting of three diesel engines.

The total capacity is 3000 KVA, 500 KVA for each engine (6 x 500 = 3000).

Availability

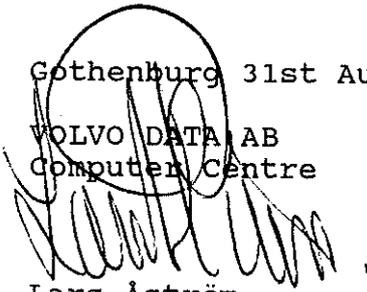

Because of this installation the Computer Centre (2100) has increased the objectives concerning availability for 1989.

In function

During this summer the Emergency power has been used on four different occasions and it has avoided two probable stoppages.
